

Technical Data Sheet

Page 1 of 1

- Properties:** AKEMI® Natural Stone Basic Cleaner is an acid-free, ready-to-use cleaner made of non-ionic surfactants, auxiliary materials, odoriferous substances and solvents. The product is free from phosphates and bases; the surfactants contained are biodegradable in correspondence with the legal regulations for surfactants.
- Application Area:** AKEMI® Natural Stone Basic Cleaner is suited for a rapid and thorough cleaning of kitchen working tables, counter tops and other small surfaces made of natural and artificial stones, e.g. marble, travertine, slate, granite, bricks and cotto slabs, tiles, fair-faced concrete and similar materials. It removes residues of food, slight traces of oil and grease as well as slight layers of stone care products and wax.
- Instructions for Use:**
1. Spray evenly on the surface to be treated.
 2. Spread with a humid cloth and allow to work for a short period of time.
 3. Take off the dirt with a humid cloth and wipe the surface well with a lint-free cloth until the surface is free of streaks.
 4. For stubborn dirt, apply AKEMI® Natural Stone Basic Cleaner more intensively, allowing it to work for 5 to 10 minutes. If necessary scrub the surface with a brush.
- Special Notes:**
- Do not apply on synthetic materials which are not resistant to solvents or rubber. If in doubt, test on an inconspicuous area.
 - A surplus of the product causes blooming and spotting, which can be removed with water.
 - For adequate waste disposal container must be completely emptied.
- Technical Data:**
- | | |
|-----------|--------------------------------|
| Colour: | colourless |
| Density: | approx. 1.01 g/cm ³ |
| pH value: | approx. 9 |
- Storage:** 2 years approx. if stored in cool place free from frost in its tightly closed original container.
- Health & Safety:** Read Material Safety Data Sheet before handling or using this product.
- Important Notice:** The above information is based on the latest stage of development and application technology. Due to a multiplicity of different influencing factors, this information – as well as other oral or written technical advises – must be considered as non-binding hints. The user is obliged in each particular case to conduct performance tests, including but not limited to trails of the product, in an inconspicuous area or fabrication of a sample piece.
